**EVERY**<sup>is1</sup>

# EVERYbody EVERYtime EVERYwhere EVERYis1

At interstuhl, we believe that good design and high comfort should be available everywhere and for everyone. EVERYis1 embodies this. It is a simple office chair for everyone, for everything, everywhere and forever. Therefore, it is perfect for the office of the future, in which workplaces become increasingly mobile, adaptable, modular and informal.

EVERYis1 represents a new simplicity of sitting – affordable and innovative. Thus, it is a real Interstuhl chair in terms of design, ergonomics, quality and environmental aspects. It offers as standard, an automatic weight adjustment, a synchronous mechanism and high-quality materials.

In short, EVERYis1 stands for excellent seating comfort without any compromise. The entry into the world of interstuhl.

**Can a simplistic office chair adapt to the user?** EVERYis1 can – because it has a newly developed Autolift System. Thanks to this technique the backrest tension adapts flexibly to the weight of the user during the recline motion. Very easy – without any effort but with the possibility to fine-tune +/- 5kg. The mechanism creates an outstanding feeling from the moment you sit on it. When you lean backwards, the entire seat pad rises. Consequently, the user slides backwards, contributing to an ideal seating posture. The mechanism can be adjusted in three seating angels. In combination with the comfortable padded seat and the mesh backrest, it guarantees excellent seating comfort.

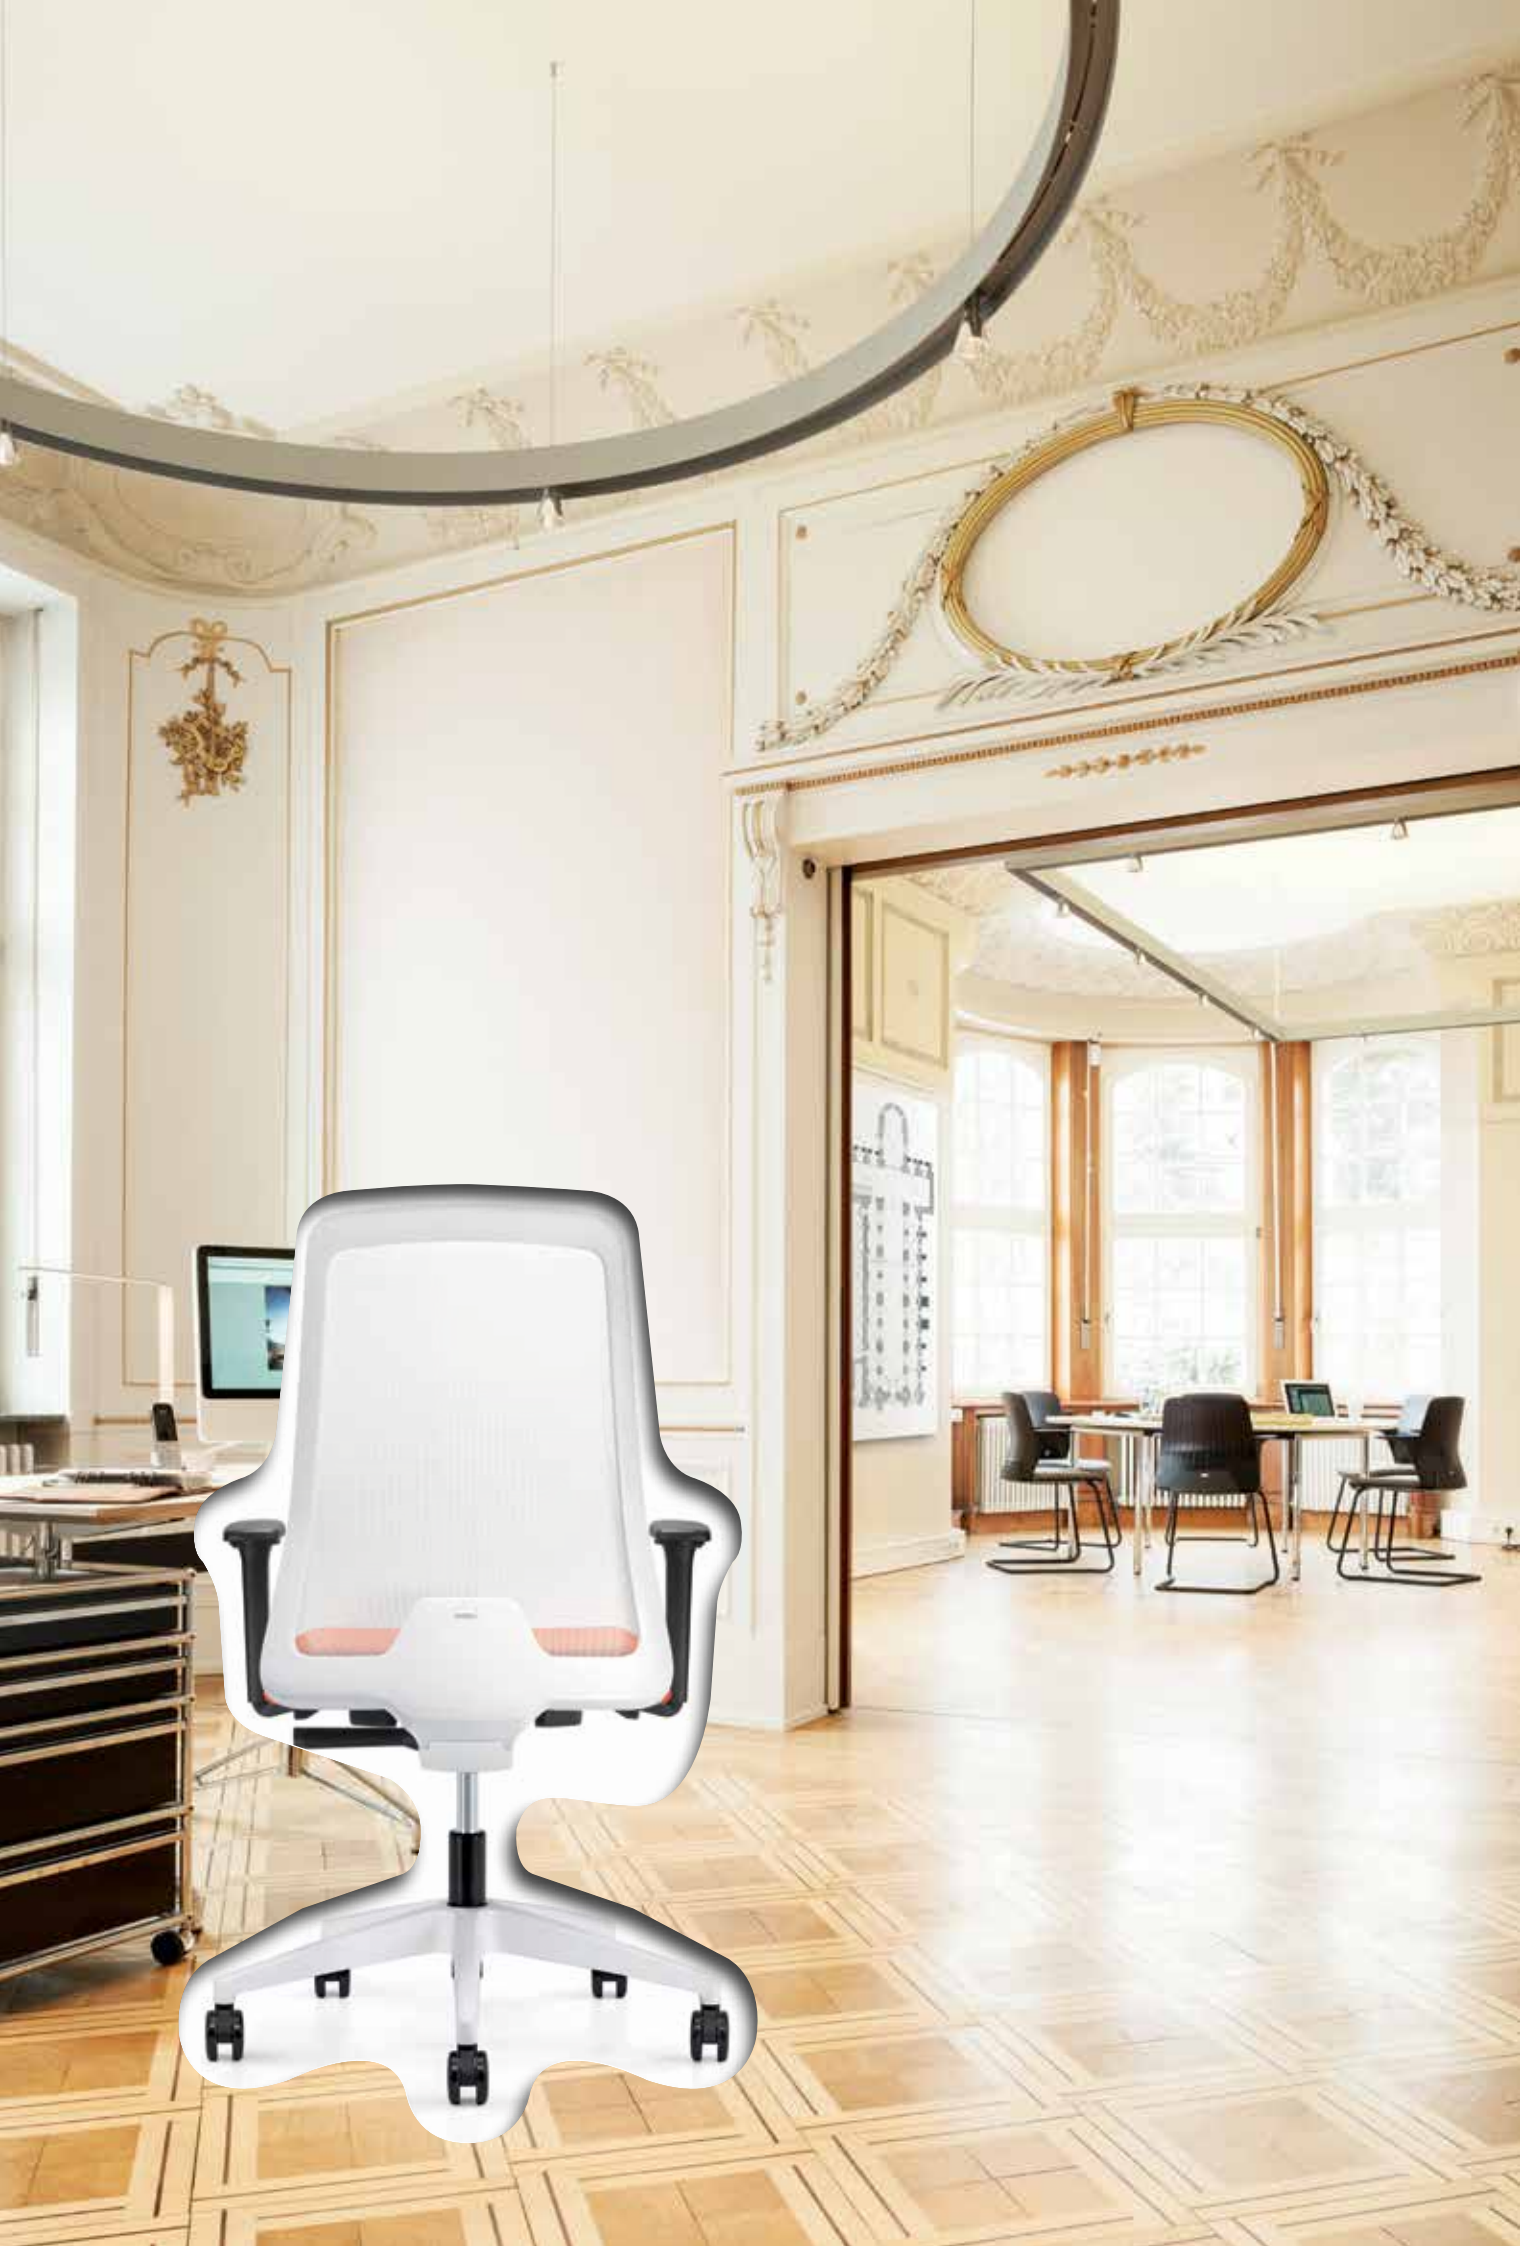

**EVERYis1 offers no compromise neither in design nor functionality.**

The black or white backrest, with its clear line, is covered with a light and breathable mesh that contributes to excellent ergonomics features. As an option, the comfort of EVERYis1 can be enhanced by a height adjustable lumbar support, seat depth adjustment, seat inclination, and 2D or 4D armrests. Welcome to the world of flexibility for the office of tomorrow!

**The dynamic, clear and transparent form** of EVERYis1 integrates seamlessly into the surrounding interior and offers many creative solutions for space planning. Regardless of design-oriented or classic interiors: With its simple but yet self-confident design, EVERYis1 fits into workspaces and home environments alike.

**The change in our office environment has begun.**

The occupations of the future are mobile, adaptable, modular and informal. We will work more frequently in different places in the office than nowadays. The slogan is: Office wherever you are. Interstuhl accompanies this change with future-oriented solutions. EVERYis1 fits perfectly into new office environments. Always and everywhere, whether as a task chair or cantilever.

**EVERYis1's colour and design do justice to its name:** Everyone will be drawn to its appearance. Besides a large number of available colours for the seat pad, the comfortable and breathable mesh is available in either black or white. The high-quality base matches to the colour of the mesh, but also shines alternatively in polished aluminium or brilliant silver. EVERYis1 offers this wide variety despite its simplicity.

**The priority of EVERYis1's development process**

was to focus on the essentials and to minimize the use of resources. Therefore, 98 % of materials used for production can be recycled afterwards. We also use a high proportion of natural materials. The durability of EVERYis1 makes the chair economically and ecologically sound. EVERYis1 received "Der Blaue Engel" award and Interstuhl received additionally the EMAS certification.

**Product design: ID AID, Sven von Boetticher**

Sven von Boetticher, was born in 1974, he studied industrial design at the Academy of Fine Arts in Stuttgart. He does not only work as a designer, but also works in areas of architecture and interior design, in order to offer comprehensive solutions for living space. He always combines his passion with quality and innovation with sustainability. This spirit and cooperating with well-known companies create products that are uncompromised in their design, that surprise in their consistency and scope. In 2011, he founded his studio "idaid" with a focus on product design and design consultancy.
